

Performance engineered process solutions

Welcome to MJ Wilson — your trusted advisor.

Process, at its core, is about finding a way, and by applying our deep expertise, problem solving creativity and relentless determination, we've found a better way for over 40 years.

Finding a way since 1972

We create solutions that only ever use certified and compliant products from reliable, trusted and renowned brands. We're now the leading supplier of process instrumentation, valves, calibration and pipeline products (including certified bolting and fasteners).

Our engineers are on hand to supply your company with custom set solutions comprising the latest technologies, products and services – all developed with certainty, efficiency and safety at their core. We measure. We optimise. We enhance. And we ensure your business is engineered to perform.

Our service is:

EFFICIENCY ENGINEERED

Custom solutions and technical support to keep you operating at peak performance at all times.

PARTNERSHIP ENGINEERED

As your trusted partner, we work closely to understand your business needs.

VALUE ENGINEERED

Being right the first time is important. We provide you with the right set of solutions at the right cost – adding value to help your business perform.

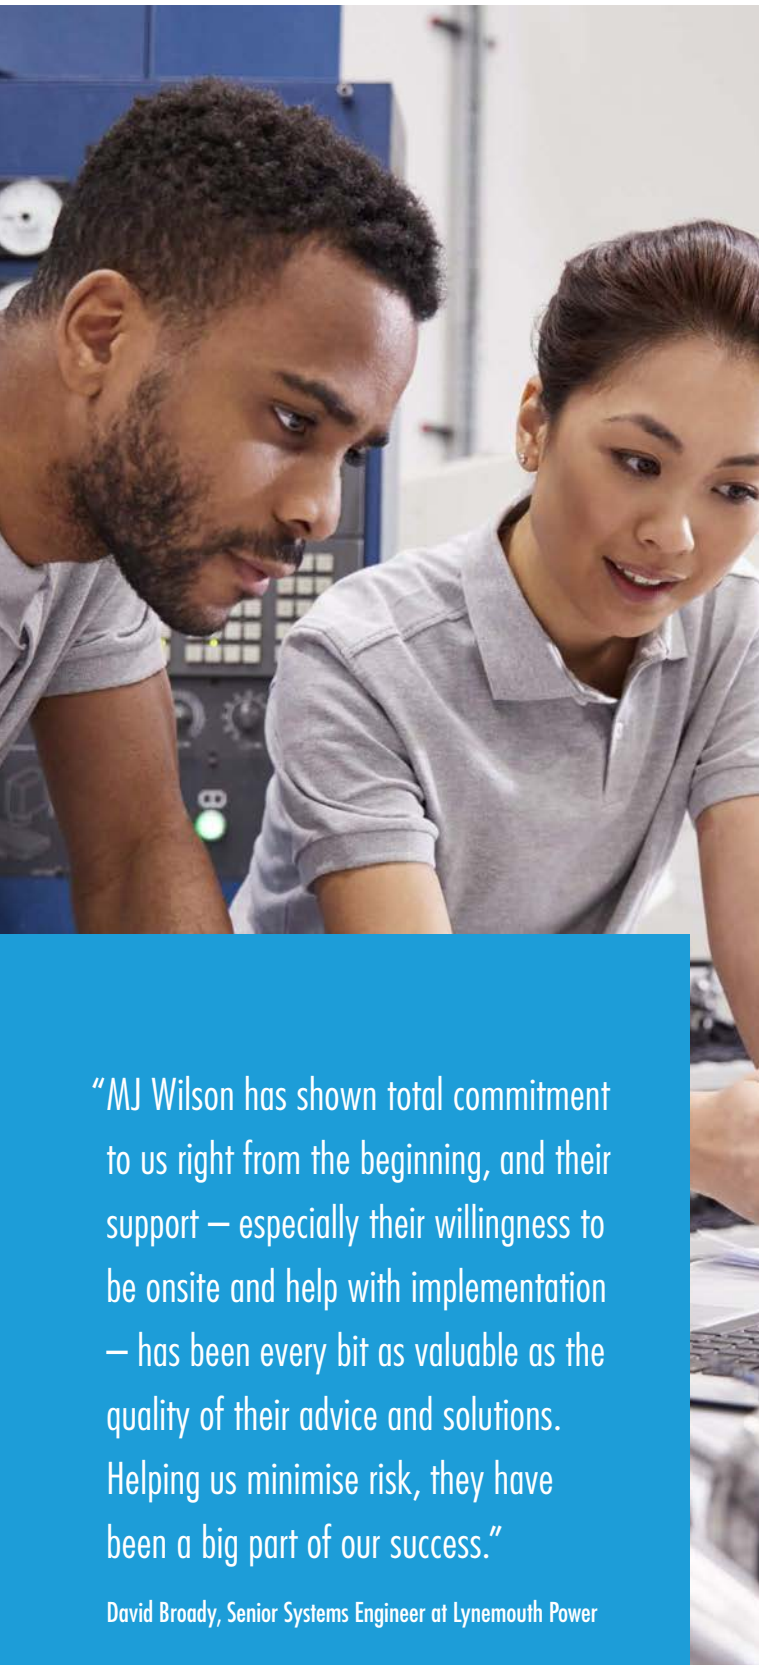

CONSISTENCY ENGINEERED

When you need to be prepared for the next challenge, we're already there with the solution and support.

SAFETY ENGINEERED

Keep your people safe with certified solutions that perform reliably in the most demanding conditions.

What we do

As a trusted partner to process industries, we quickly and creatively devise engineered solutions that enhance value through productivity, efficiency, safety and performance — giving you certainty as we solve even the most complex measurement challenges.

We know the pressures you're under to reduce total cost of ownership in your plants. We know how to help you do this with right-first-time performance engineered solutions from major manufacturers. And we also know how to add value at every measurement point to keep you operating at peak performance.

When you need us, we're already there.

THE INDUSTRIES WE SUPPORT:

- Power
- Pharmaceutical
- Food & beverage
- Aerospace
- Metals
- Oil & gas
- Chemical
- Waste & water
- Biofuels
- Pulp & paper

Efficient solutions from a trusted advisor

Our engineers will always find a way to resolve the most complex engineering and process challenges. Determined and creative, our process experts develop solutions that are defined by productivity, efficiency, safety and performance.

It's what makes us the engineer's engineer. We don't just understand every nuance of the instrumentation we supply, we understand the deep complexities of how it can be used effectively in your specific process — and how we can provide the certainty in the measurements you need.

AN EFFICIENT PARTNERSHIP BUILT ON EXPERTISE

Every customer's system is different, with different parameters and operations. So we collaborate closely with you to develop custom solutions that can keep your operations running, while continually enhancing them. This gives you certainty that your plant is always performing at peak operational efficiency — resolving all the engineering and process challenges you may encounter.

"MJ Wilson has shown total commitment to us right from the beginning, and their support — especially their willingness to be onsite and help with implementation — has been every bit as valuable as the quality of their advice and solutions. Helping us minimise risk, they have been a big part of our success."

David Broady, Senior Systems Engineer at Lynemouth Power

High-performance instrumentation meets in-depth service

When you're under pressure to perform smarter and faster, you can't afford downtime. When you need us, we're already there, supplying the expertise that caters for every need. Experts in the field who are determined to keep you at the forefront of your sector with industry-leading services.

CALIBRATION CERTAINTY

For every vital measure application, we can calibrate your equipment to deliver consistent measurements, accurately.

Across the UK, our qualified technicians perform a complete range of specialist calibration services that deliver certainty for all of our customers.

These services cover:

UKAS calibration

Lab calibration

Site calibration

Connected thinking

Just like pipeline products connect your equipment, our engineers connect you with the optimum solution for your exact needs. With an in-depth understanding of your challenges, and extensive knowledge of these connectors and operating conditions, we match the right solution to every problem, giving you complete certainty that your equipment will operate in peak condition for longer.

GASKETS

FLANGES

ENGINEERED PIPELINE SOLUTIONS

Within our broad portfolio of products, we offer a dedicated set of quality-controlled and certified industrial pipeline components. For every process pipeline application from refineries to on and offshore facilities, chemical manufacturing to process industries, we deliver consistently reliable and flexible engineered solutions that can make a measurable impact on your operations.

- All of our pipeline products, components and solutions are quality assured. So, you can rely on their quality and integrity – as well as the fact that they'll perform exactly when, where, and how you need them to.
- Our team carries more than 100 years' experience in process and pipeline solutions. Very simply, we know pipelines inside and out – from valves, tubes, flanges and fittings to product certification, technical support, energy efficiency and value.
- We hold a huge range of pipeline components in stock ready to deliver when and where they're needed, fast. We can also source difficult-to-find products so you can be certain that whatever you need, we'll have it in the pipeline ready for you.

FORGED FITTINGS

INDUSTRIAL PIPE

BUTT WELD FITTINGS

INSTRUMENTATION TUBING

GENERAL VALVES

BUTTERFLY VALVES

BALL VALVES

BOLTING & FASTENERS

STEAM TRAPS

The certainty of brands you trust across the UK

There's a confidence and peace of mind that comes with the world's leading manufacturers.

We have established partnerships with these trusted brands which enables us to select, specify and provide solutions using the very latest products and technologies. Empowering every client to get more efficiency and performance out of their operations. Our growing network of branches and workshops across the UK is supported by Area Sales Managers who provide local expertise and support.
