Coronavirus Update 24th March 2020

With the Prime Ministers announcement last night and the continued escalation of the Covid-19 outbreak in the UK we at MJ Wilson feel it is important to keep you all up to date on how we are continuing to maintain our levels of service across all our functions.

We are currently putting in place several measures to ensure this

- 1- All our branches remain open to quote enquiries, receive and deliver orders.
- 2- We have robust Supply chains in place to cater for a prolonged issue. In addition to this we have invested heavily in inventory to ensure continuity of Supply.
- 3- We have instructed a 'work from home' policy for all non-essential staff.
- 4- The external sales team have been instructed to only attend essential meetings in person and where possible hold video conference's or telephone conference call.

We remain confident in our ability to supply and support you

MJ Wilson will continue to take all precautionary measures to ensure the safety of our employees and to minimise the risk of infection in line with Public Health England guidelines. We will continue to adjust our operations according to the recommendations from our parent company MRO+ Solutions and government guidelines as we monitor the on-going impact of COVID-19.

Whilst the situation continues to escalate, and the scale of disruption remains dramatically uncertain, MJ Wilson hope the measures we have put in place will allow us to continue to trade normally during this difficult period. Should the situation change we will issue further updates.
