Brooks-Oval™ Models: BM04, BM07, BM10, BM40 & BM50

- Sizes for wide flow ranges, 0.26 to 92.5 GPM (1 to 350 LPM)
- Very low pressure drop
- Standard Viscosity to 1000 Cp (Centipoise)
- High Viscosity Rotors (Gears) to 1 million cP
- High Accuracy, 1/2% rate or better
- 0.03% repeatability
- Only two moving parts
- Reed or solid state Hall Effect Switch
- Screwed, Flanged or Tri-Clover® Connection options
- Body's available in Aluminum, PPS or 316 Stainless Steel
- Two Electronic Display options standard

DESCRIPTION
The Brooks® Models BM04, BM07, BM10, BM40 and BM50 are positive displacement oval gear flowmeters designed for applications requiring high accuracy measurement of clean liquids with viscosity's less than 1000 cP standard, or up to 1 million cP with rotors (gears) cut for high viscosity. All meters are available with a pulse output from a reed switch or solid state Hall effect switch for remote registration and/or totalization. Two optional LCD displays offer rate, resetable total, non-resetable total and the option for simple batch (Deluxe Display). Also offered on sizes BM10 and larger is an option for mechanical totalization. All six meters are available with PPS rotors (gears) as standard. Also available as an option are 316 SS rotors (gears). The Model BM07 is only available with a PPS body, rotors (gears) and optional Hastelloy C® rotor (gear) shafts. The BM07 is specially designed for corrosive liquid service when the optional Hastelloy C shafts are selected. The Model BM10 is available with optional 1 inch Tri-Clover connections in all 316 Stainless Steel construction.

PRINCIPLE OF OPERATION
The oval meter is a positive displacement meter. As the fluid being measured passes through the meter, it rotates 2 oval gears in a measuring chamber to displace a precision volume of fluid. A sensor detects the gear rotation to determine displaced volume and flow rate.

Fluid pressure rotates the oval gears, Figure 1. In position 1, the fluid exerts a clockwise driving force on Gear A. There is no net driving force on Gear B. It is perpendicular to the flow so the fluid forces are balanced around the shaft. As the gears rotate to position 2, the fluid begins to exert a force on Gear B. At position 3, all the driving force is on Gear B. This alternating driving force provides a smooth rotation of almost constant torque.

The meter design minimizes the slippage between the gears and the measuring chamber wall. As a result, the oval meter is less affected than other designs by the liquid's viscosity and lubricity.

Figure 1  Principle of Operation Chart
BM Oval Series

SPECIFICATIONS

Capacities
See Table 1: Capacities
For capacities with higher viscosities: Refer to Table 5

Performance
Accuracy:
+/- 0.5% when viscosity is > 5 cP
+/- 1% when viscosity is < 5 cP
Pressure Drop:
< 3 PSI at full scale flow when viscosity is 1 cP or less and not more than 15 PSI at 1000 cP

Ratings
Maximum working pressure: See Table 2
Maximum working temperature: See Table 2
Ambient Temperature: -4° F to 104° F (-20° C to +40° C)
Meter sizes BM04, BM07, BM10 & BM50 have been subected to a 4 times maximum working pressure test. Meter size BM40 has been subjected to a 3 times maximum working pressure test.

Pressure Equipment Directive (97/23/EL)

Outputs

Reed Switch
Detection Method: Reed switch, two wire SPST N/O contact
Max. Voltage: 150 Vdc maximum
Contact Capacity: 0.25 AMPS
Rating 3 Watts

Hall Effect Switch
Detection Method: Hall effect switch
Response Frequency: 1,000 Hz maximum
Output Pulse: Unfactored voltage pulse
Input/Output = 4.5 to 24 Vdc (4.6 ~ 9 mA)
Open Collector 25 mA output NPN compatible with digital logic. Reverse power protection

Notes:

- The maximum pressure with mechanical display limits above applications to 500 psig (3450 kPa) or the lesser of the meter listed.
- All pressures listed are at 100° F (38° C) For higher temperatures, pressure will be reduced per the standard flange specification ANSI B16.5.
BM Oval Series

Standard LC Display
The standard liquid crystal (LC) display is available on the BM04, BM07, BM10, BM40 and BM50 models. Features:
- Seven (7) digit x 11/16 inch (17mm) Liquid Crystal Display.
- Rotatable in 90° increments.
- Selectable flow rate display in U.S. Gallons, Liters, Cubic Meters (M3), Mililiters and Barrels
- 2 total displays - resettable and non-resettable, up to 999999.99 units (gallons or liters)
- Programmable calibration constant (K-factor)
- Long life lithium battery Pulse output of ancillary equipment

Deluxe LC Display
The Deluxe liquid crystal (LC) display is available on the BM04, BM07, BM10, BM40 and BM50 models. Features:
- Seven (7) digit x 1/2 inch (12.7mm) Liquid Crystal Display
- Rotatable in 90° increments
- Selectable flow rate display in U.S. Gallons or Liters (according to model selected)
- 2 total displays - resettable and non-resettable, up to 999,999.9 units (gallons or liters)
- Factory set calibration constant (K-factors)
- Additional nine (9) calibration constants (K-factors) available for "in the field" settings
- Long life lithium battery
- Extended life battery available as option
- Pulse output of ancillary equipment
- Approved for hazardous locations when used with standard battery for EExia IIC T6 (PTB nr. Ex-93.C 4033X)
- Pre-settable batch control function up to 9,999 units (99.99, 999.9 or 9,999 optional settings).
- Ten (10) preset batch quantity storage capacity.
- Single or dual valve actuation output to be used with add on trip amplifier

Mechanical Display
The mechanical display is available on the BM04, BM10, BM40 and BM50. Features:
- U.S. Gallons or Liters
- Two total displays:
  - 1 to 9,999 liters or 1/10 to 999.9 U.S. Gallons (resettable)
  - 1 to 999,999 liters (X10) or 1 to 999,999 U.S. Gallons (Non-resettable)
- Push button reset
- Rotatable in 90° increments

BROOKS LOCAL AND WORLDWIDE SUPPORT
Brooks Instrument provides sales and service facilities around the world, ensuring quick delivery from local stock, timely repairs and local based sales and service facilities.
Our dedicated flow experts provide consultation and support, assuring successful applications of the Brooks flow measurement and control products.
Calibration facilities are available in local sales and service offices. The primary standard calibration equipment to calibrate our flow products is certified by our local Weights and Measures Authorities and traceable to the relevant international standards.

START-UP SERVICE AND IN-SITU CALIBRATION
Brooks Instrument can provide start-up service prior to operation when required.
For some process applications, where ISO-9001 Quality Certification is important, it is mandatory to verify and/or (re)calibrate the products periodically. In many cases this service can be provided under in-situ conditions, and the results will be traceable to the relevant international quality standards.

CUSTOMER SEMINARS AND TRAINING
Brooks Instrument can provide customer seminars and dedicated training to engineers, end users and maintenance persons.
Please contact your nearest sales representative for more details.

HELP DESK
In case you need technical assistance:
Americas
Europe
Asia

Due to Brooks Instrument's commitment to continuous improvement of our products, all specifications are subject to change without notice.
